#### **EC-Council -- Certified Security Analyst/Licenced Penetration Tester**

The ECSA program is a highly interactive 5-day security class designed to teach Security Professionals the advanced uses of the available methodologies, tools and techniques required to perform comprehensive information security tests. Students will learn how to design, secure and test networks to protect *your organization* from the threats hackers and crackers pose. This class will help you perform the intensive assessments required to effectively identify and mitigate risks to the security of your infrastructure. As you learn to identify security problems, you also learn how to avoid and eliminate them, with the class providing *complete* coverage of hacking and network security-testing topics.
